

Camerz™ Video Viewing System

The Camerz Video Viewing System combines the ease of use of a high-volume portrait camera with the technology of today's digital SLR cameras. By adapting a high-resolution CCD camera to the viewfinder of the SLR, this system allows the subject to be viewed live on a large 4" color LCD screen. Captured images and other information normally displayed by the camera can also be viewed on the LCD. This rotating screen is mounted on an adjustable arm that can be set in a position that is convenient and comfortable for the photographer. Configurations are available for use with a variety of the most popular digital SLR cameras.

An optional USB port and software allows live and captured images to be viewed on a PC. The live image window can be opened and viewed, even when an image and data management application or other programs are being used.

A rotating camera mount is included for photographing subjects horizontally and vertically. An optional Lindahl™ Lens Shade can also be adapted to protect the lens, prevent lens flare and accommodate the wide assortment of Lindahl filters and vignettes.

Features

- Comfortably and quickly compose and capture images using a wide variety of digital SLR cameras such as Canon®, Fuji®, Kodak®, Nikon® and Olympus®.
- Quickly review captured images on the LCD screen. The system will automatically switch back to live video after the preset time limit has been achieved.
- Not needing to look through the viewfinder allows the photographer to interact with the subjects, resulting in consistently better expressions.
- Throughput is increased and fatigue is greatly reduced by eliminating the need to step behind the camera and bend over to look through the viewfinder for every exposure.
- Camera and LCD screen can be quickly rotated when switching between vertical and horizontal orientations.
- A composite video output connector provides the option to display on larger screens.
- Optional USB port allows live and captured images to be viewed on a PC while running other programs.
- Compatible with the Lindahl Digital Lens Shade System to create a variety of custom effects without the need to go through the time consuming task of digital image manipulation.
- The Camerz Video Viewing System gives a distinctively professional look to the common SLR camera.

Technical Specifications

Power	12 Volt (power adapter included)
Viewing Screen	4.2" High Resolution Backlit Color LCD
Viewing Screen Support	12" Articulating Multi-Position Support Arm
Video Camera	Low Light; High Resolution CCD Camera with Automatic Signal Switching
Video Output	Composite Video Out
PC Interface	USB (optional)
Sync Output	1/4" Female Jack
Camera Support	Lindahl Rotating Bracket with Vertical/Horizontal Positions
Base Size	6.25" wide; 5.75" deep; 2.4" high
Weight	4lbs
Mounting	Standard 1/4-20 Tripod Mount

Standard and USB models are available with built-in viewing screen.

The USB version is also available without the built-in viewing screen.

Optional Lindahl Lens Shade allows the use of a wide variety of Lindahl filters and vignettes
